Easy To Understand Part Numbers

Part numbers are divided into four sections. The first is the code for the product family; the second is the thickness of the product; the third describes width and length; and the code at the end indicates unique characteristics (when applicable) and color.

ROI/Cost Savings Analysis for ABC, Inc Assessment No. 1719

Thank you for requesting your custom ROI report. We have helped many facilities like yours find solutions to reduce absenteeism resulting in improved productivity, safety and morale.

Below are the results based upon the data you provided. If you need any additional information, please do not hesitate to contact us.

Number of standing workers: **150**

Average % of absenteeism (National Industry Average is 3%): **3**

Average hourly pay rate: **\$18**

Number of shifts: **1**

Primary issues: **Slips and falls Workforce fatigue**

Budget or estimated spend on matting: **I don't know. Calculate the national average of \$100 per standing worker.**

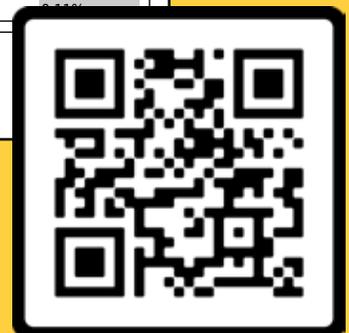

If we can show a positive return, when would you like us to follow up?: **2-3 weeks**

We assume we will help reduce the number of injuries by 1 every four years per 100 employees AND that we can help improve absenteeism by 5%. Based on 150 standing workers, your current absenteeism of 3%, your average hourly rate of \$18, and statistical data from the National Safety Council - a \$15,000 investment returns 216% year 1, 531% year 2 and 847% year 3.

	Year 1	Year 2	Year 3	Total
Investment in Wearwell Product	\$ 15,000			\$ 15,000
Average Total Cost of Injury	\$ 103,828	\$ 103,828	\$ 103,828	\$ 311,483
Cost of Absenteeism	\$ 168,480	\$ 168,480	\$ 168,480	\$ 505,440
Annual Injury Savings	\$ 38,935	\$ 38,935	\$ 38,935	\$ 116,806
Annual Absenteeism Savings	\$ 8,424	\$ 8,424	\$ 8,424	\$ 25,272
Grand Total Savings per Year	\$ 47,359	\$ 47,359	\$ 47,359	\$ 142,078
ROI - Cumulative	216%	531%	847%	847%
Payback period in years - Cumulative	0.32%	0.16%	0.11%	0.11%

Our one of a kind ROI report delivers a customized report based on your unique operations. Let us show you how much Wearwell matting and flooring can save you, and how quickly you can see a return on the investment.

WATCH OUT!

WATCH can:

1. Improve employee productivity
2. Reduce lost time
3. Reduce injuries and incidents
4. Upgrade facility aesthetics
5. Save money

The Right CHOICE

Knowing what to WATCH for provides knowledge for not only what to purchase, but when to replace

ARE YOU AT RISK? LOOK OUT FOR THE CUES IN YOUR FACILITY

W
WET

VISUAL CUES:
Pooling water, workers are slipping or are not sure-footed

CONCERNS:
Loss of productivity, slips or falls, and possible micro bacterial growth

A
APPLICATION

VISUAL CUES:
High-voltage signs, handling of static-sensitive products, presence of welding equipment or paint and finishing equipment

CONCERNS:
Employee safety, quality control, and productivity

T
TILE
SEPARATION

VISUAL CUES:
Modular matting components that were once connected are now loose, haphazard pieces, interlocks torn

CONCERNS:
Trip hazards, work disruption and productivity loss due to constant repositioning

C
CAUTION

VISUAL CUES:
Stacked mats, cardboard, pallets, or use of unconventional materials are clear indicators that the workforce is looking for standing relief. Mats that are torn or badly worn, or used in the wrong application

CONCERNS:
Trip hazards, lack of support, poor aesthetics, worker morale

H
HOW WORKERS
MOVE

VISUAL CUES:
Workers are moving between workstations. If mat(s) are present, workers repeatedly step off and back onto mat(s). If so, you may need an ergonomic flooring solution.

CONCERNS:
Trip hazards, heel strike, and severe impacts if falls occur

THE WEARWELL LIMITED LIFETIME WARRANTY

We're so confident in the quality and craftsmanship that we back our most popular products with a Lifetime warranty! Look for this symbol throughout the catalog and rest assured that we have you covered!

Don't Be Confused

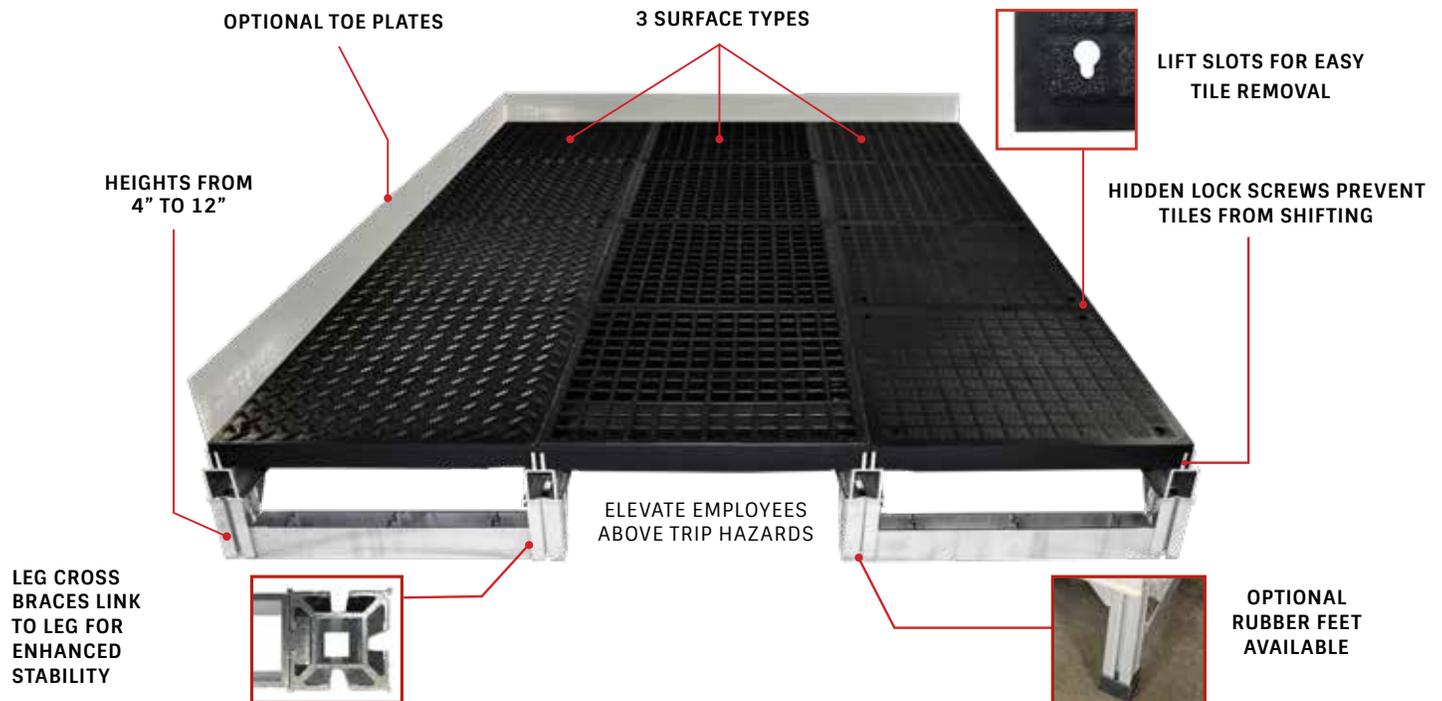

A lifetime warranty is a statement of confidence in our manufacturing expertise and the quality of materials we use. Every application is different so replacement cycles will vary.

Let's Be Real

No matting or flooring product is indestructible.

If a competitor's warranty seems too good to be true, it probably is! Read the fine print. 7

FOUNDATION PLATFORMS

Ergonomics is all about fitting your workspace to your workforce. Reaching up, over or down takes a toll on the health of your team and the efficiency of your operation. Putting your team at the proper elevation to the task at hand is critical. Foundation provides all the stability of traditional platforms, but at the fraction of the costs.

FOUNDATION TILES

More than just rugged good looks - they provide undeniable traction! Sure-footed employees make for a safer, more productive team.

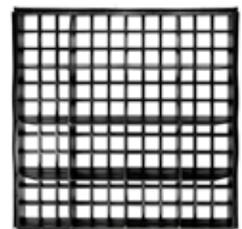

DIAMOND-PLATE

OPEN

NEW

What are FOUNDATION® Platforms?

FOUNDATION® is a modular work platform system that's customizable, reconfigurable and affordable. Gone are the days of expensive, labor intensive work platforms that can't conform as needs change.

Is FOUNDATION® tough enough?

FOUNDATION® is a light-weight but heavy-duty work platform. The solid aluminum frame is designed to withstand MUCH greater stresses than are ever required for a work platform. Each 18"x18" tile boasts a 400 lb load rating with a built-in safety factor of 3:1. A tile will not fail until the load approaches 1,200 lbs. Again, far exceeding the normal expectations of a work platform design. This unique system beats expensive fabricated systems that use wood, steel or other materials.

Is FOUNDATION® just for elevation?

FOUNDATION® is offered in a variety of tiles, each designed to meet the unique demands of your environment. Whether it's slip prevention, drainage, or simply elevation, FOUNDATION has you covered! Need to add an anti-fatigue mat for additional comfort? We have a tile for that, too.

How easy is FOUNDATION® Installation?

The FOUNDATION® system is installed in a snap. No major tools are required. Simply lay out the frame, slide in the cross bars and snap in the tiles.

FOUNDATION[®] KITS

FOUNDATION MODULAR WORK PLATFORMS RAISE EMPLOYEES TO THE PROPER HEIGHT FOR SAFETY AND PERFORMANCE. AVAILABLE IN STANDARD AND CUSTOM HEIGHTS AND STYLES.

POWERHOUSE™
by WEARWELL

CABLE PROTECTION

What are POWERHOUSE™ cable protectors?

The POWERHOUSE™ cable protection system is used to protect cables and hoses. Pneumatics, hydraulics and electricity are the powers that drive your business. Inside or out, hold the line with the POWERHOUSE™ cable protection system. Equipped with bright yellow lids for high visibility and quick recognition, Secure Lid-Lock feature (for general purpose and medium duty) to protect pedestrian traffic by preventing trip hazards. The POWERHOUSE™ cable protection system keeps people safe while protecting your equipment.

Why choose POWERHOUSE™ cable protectors?

POWERHOUSE™ cable protectors can be utilized indoors or outdoors. Constructed from durable TPU and PE, they are highly resistant to corrosion from oils and chemicals, and guard against impact and abrasion. POWERHOUSE cable protectors can withstand up to 20,000 pounds of pressure per tire. Hidden hinges allow for the lid to lie flat while protecting your cables from damage. POWERHOUSE™ cable protectors are covered by a 3 year indoor/1 year outdoor manufacturer's warranty.

How do I install POWERHOUSE™ cable protectors?

Create a custom path for your cables with the use of 22.50 left and right turns. Simply lay the female end over the male end to create durable interlocking connections for a secure hold that prevents separation from pedestrian and wheeled traffic.

Wearwell.com/POWERHOUSE

FLOORING

What is ergonomic flooring?

Ergonomic flooring is made up of interlocking tiles. This modular design lets users replace damaged sections easily and expand or contract ergonomic work areas as needed. Tight seams, dependable installation, and a patented fastening system hold tiles so they stay put in application until unzipped for easy replacement and reconfiguration. That can't be said for modular matting.

Why choose ergonomic flooring?

Because your team doesn't just stand — they move — ergonomic flooring is your team's best defense against slips, trips, falls, heel strike, back pain, and muscle aches. Available in multiple styles. You can create the right field of play for your field of work. You can even incorporate color to define paths, heighten safety, and use in place of temporary tapes.

How do I install ergonomic flooring?

Installing Wearwell ergonomic flooring is a snap. Each of our ergonomic flooring tiles has male connectors on two sides and female connectors on the other two sides. Simply connect the tiles and trim them to accommodate any space. No adhesives or fasteners required.

33%

Occupational Injuries

are musculoskeletal resulting from over exertion or bodily reaction caused from an incident or repetition.

REJUVENATOR[®] FLOORING

Rejuvenator is a quality line of urethane matting and flooring — the undisputed record-holder when it comes to comfort, resilience, and long-term value.

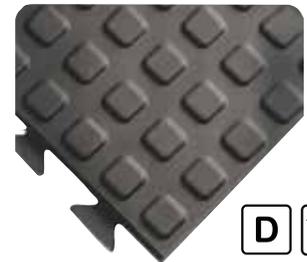

PATENT US D653893

Rejuvenator[®] flooring, runners, and workstation mats will help your team stand stronger, longer. This ultimate product delivers the combination of durability, ergonomics, and awesome good looks! Manufactured from 100% polyurethane, Rejuvenator comes with an unparalleled lifetime-warranty. Simply put, we've engineered it to outlast and outperform any would-be rivals.

502

Flooring

Rejuvenator[®] Flooring features large, 3' x 3' (91cm x 91cm) and 1' x 3' (30cm x 91cm) modules — that interlock on all four sides to customize on-site virtually any flooring configuration. The interlock is incredibly effective and also hidden so the ergonomic floor you've created is seamless and stable underfoot. Having the ability to customize in one-foot increments and finish off with beveled ramps (yellow or black) sets it apart from all other polyurethane "wannabes."

 Rejuvenator[®] edging is universal to all Rejuvenator[®] tiles

Rejuvenator flooring has 2" (5cm) wide ramps that provide a visual cue and transition for on-off access.

502

Runner

Rejuvenator® Runners give you the option to create 2' (61cm) and 3' (91cm) wide runs of ergonomic matting. With a female end and a male end, all that's left is to connect as many centers as you need for your space. The molded-in ramps reduce installation time and costs.

ERGODECK[®] MAX FLOORING

ErgoDeck[®] flooring was engineered with the evolving workplace in mind and can be used to cover large workspaces or custom work cells where traditional matting products fail. Think of ErgoDeck[®] as the “field conditions” your industrial athletes need to play their best.

PATENT US 8,006,443B2 PATENT US D5210,650S

ErgoDeck[®] tiles have patented LockSafe[®] technology, that holds secure but can be taken apart and reconnected on demand. Available in a wide variety of styles, ErgoDeck[®] MAX is a combination of Nitricell[®] sponge and silicone-free PVC while other ErgoDeck[®] Flooring products are made of 100% silicone-free PVC.

The robust 7/8" (22mm)-thick tiles install quickly with no tools required. Tiles from the different ErgoDeck[®] models can be combined.

Reduce costs and improve safety! Easily replace single tiles or sections as needed. Reduce slips, trips, falls, and severity of impact. Avoid costly floor repairs, cover cracks that may pose hazards, and improve aesthetics.

598/599/600

MAX

Our greatest innovation to date, combining ErgoDeck with our premium Nitricell[®] sponge to create ErgoDeck[®] MAX. ErgoDeck[®] MAX offers structural support AND impact absorption for healthier and more productive employees, even in multi-shift operations.

ErgoDeck[®] MAX is best suited for dry environments, including manufacturing, transportation, automotive or fulfillment, anywhere workers stand on hard, cold, unforgiving concrete.

Whether it's assembly lines, CNC workstations or quality control inspection, ErgoDeck[®] MAX will outperform expectations to reduce safety incidents and absenteeism, resulting in improved morale and productivity.

ErgoDeck[®] MAX carries a Limited-Lifetime Warranty.

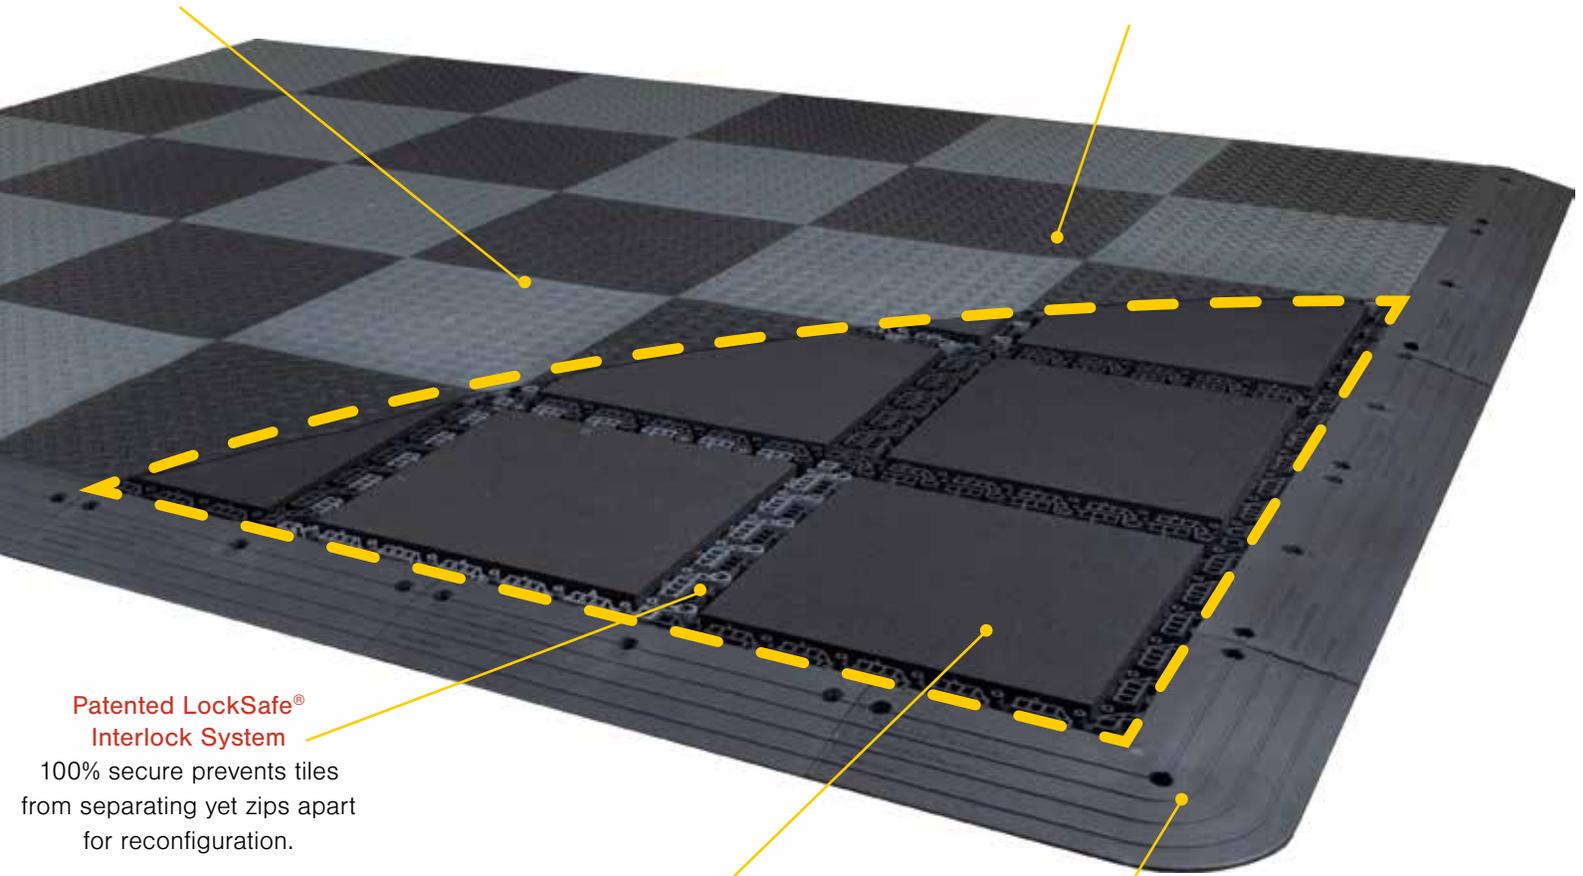

ERGODECK MAX[®]

Easy To Install

Large 18" x 18" (46 cm x 46 cm) tiles cover large areas quickly.

Flexible PVC FOUNDATION

Provides structural ergonomic support and impact absorption.

Patented LockSafe[®] Interlock System

100% secure prevents tiles from separating yet zips apart for reconfiguration.

Nitricell[®] Premium Sponge Core

Formulated for crush resistance and unmatched performance. Absorbs repeated compression and bounces back to its original form, at a rate that can't be beat by any other sponge in the industry.

Universal Ramps

The 6" (15 cm) wide safety ramps work on our entire line of ErgoDeck[®] tiles.

- **Wall-To-Wall ErgoDeck[®]** - All styles of ErgoDeck[®] connect together. So go ahead, mix and match.

- **Value** - Easily replace single tiles or sections as needed. This keeps replacement costs down!

ERGODECK® HEAVY DUTY FLOORING

ErgoDeck® flooring has a patented LockSafe® mechanism guarantees secure connections that can be "zipped" apart when needed. If a tile wears out, simply pop it out and replace it.

PATENT US 8,006,443B2 PATENT US D5210,650S

HEAVY DUTY

560/561/562/563/569/591 Heavy Duty

ErgoDeck® Heavy Duty Solid (562) & Diamond-Plate (591) are designed for work areas with heavy foot traffic. The firmer compound supports heavier loads, while the underside box-spring design provides structural support and impact absorption to reduce heel strike, even in multi-shift operations.

ErgoDeck® Heavy Duty Open (560), the perforated design facilitates drainage with 15/16" (24mm) holes, while the firm structure of the 100% silicone-free PVC compound provides a solid FOUNDATION for carts and workers. GRITSHIELD™ can be added to both the Solid and Open styles for added traction.

ErgoDeck® Smooth™ Heavy Duty (569) Ideal for cart traffic and pivoting, ErgoDeck Smooth™ Heavy Duty is a robust, high performance solution for wheeled traffic that makes moving heavy loads easier than ever! Unlike soft mats that deform under load, ErgoDeck Smooth features a lightly textured surface that is easy to clean but without compromising traction..

Optional 6" (22cm) wide ramps are cart friendly, allowing easy on-off access.

552/553

Heavy Duty No-Slip Cleats

ErgoDeck® flooring with Integrated No-Slip Cleats delivers a sure-footed work surface for maximum productivity, performance, and safety — even in the most demanding workplace conditions. The cleated design — modeled after the cleats that professional athletes wear for traction — overcomes harsh and slick workplace conditions.

While gritted mats provide some temporary traction, they wear with use and become slippery with saturation over time. ErgoDeck® with Integrated No-Slip Cleats, on the other hand, is built to last. Unlike gritted mats — which cannot be maintained and cleaned — ErgoDeck® with Integrated No-Slip Cleats can withstand power washing, scrubbing, and aggressive cleaning. Available in a closed design and an open with 15/16" (24mm) holes, for areas that have a lot of fluids.

557

ErgoDeck® ESD

tatic electricity is created by two materials rubbing together, and seeks a path to ground – often through the human body or through sensitive, conductive equipment. The best way to eliminate these risks is to create a static-dissipative environment. ErgoDeck ESD – a comprehensive flooring solution – offers the best defense. Used over conductive sub-flooring, ErgoDeck ESD is your best defense against fatigue and static shock that could compromise the quality of your products. Made of a proprietary TPO/Carbon blend, the ESD properties are throughout the entire tile. Must be used over conductive flooring. Positive interlocks stay secure, ensuring areas of any size are protected When installed wall-to-wall, ramps and corners aren't necessary. For transition areas use ErgoDeck's standard, universal ramps.

WEARWELL
F.I.T.™ SYSTEM

F.I.T.™ Tiles are the most versatile 12" x 12" (30cm x 30cm) interlocking ergonomic flooring system on the market. Its patented LockSafe® connections and lightweight design make handling and maintenance a snap. US REG NO. 3,739,71

Today, workspaces are designed in a wide variety of shapes and sizes. That's where an easy, customizable solution like F.I.T.™ (Functional Interlocking Tiles) comes into play. The F.I.T.™ Tiles are 5/8" (16mm) thick, 12" (30cm) x 12" (30cm) interconnecting, 100% silicone free and feature a lightweight, flexible design that allows tiles to be cut and reconnected every three inches. While the LockSafe® Positive Interlocking System prevents separation during use, one can easily unzip tiles to replace single pieces or sections as needed.

Thanks to versatility and durability, the F.I.T.™ system can be used for many otherwise challenging applications. Cover a less-than-ideal floor (such as cracked concrete) with a F.I.T.™ system to provide standing relief, safety underfoot, and traction for workers — not to mention world-class aesthetics. Assemblies of the F.I.T.™ Tiles can also be rolled up without coming apart, making it an ideal solution for areas that require frequent cleaning.

See F.I.T. Kits on Pg. 34

548

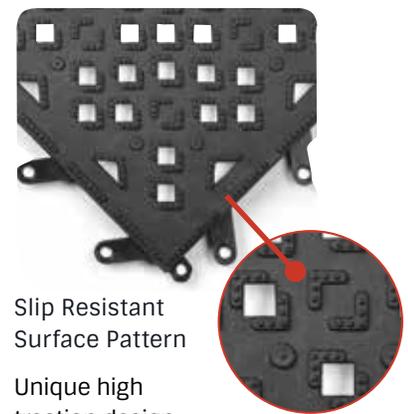

F.I.T.™ Comfort Deck

Out with the old and in with the new and improved!

Comfort Deck was a well-loved Wearwell product, but it had a few flaws. There were size limitations, it lacked anti-fatigue benefits and couldn't be customized. We set out to find a better solution.

F.I.T.™ Comfort Deck has the surface pattern loved by all with the benefits of F.I.T.!! The highly textured surface design provides extra traction in slippery conditions. The tiles feature an open-hole design that allows for quick drainage resulting in a drier standing area. The unique nub pattern provides the ultimate comfort and anti-fatigue surface for your Industrial Athletes to stand on.

MATTING

What is ergonomic matting?

Ergonomic matting is the tried-and-true anti-fatigue solution for workstations and assembly lines. Made up of two layers — a surface and a sponge foundation — a mat should never be judged by its cover. Only Wearwell offers three types of sponge, giving you degrees of cushion, rebound, and resilience to choose from.

Why choose ergonomic matting?

Ergonomic matting provides support to standing workers throughout your facility. Specially designed mats also act as a safety measure, defending against workplace dangers such as slips, trips, and falls, as well as contamination and high voltage. Studies show, too, that matting delivers quantifiable improvements in productivity and lost time.

How do I install ergonomic matting?

Ergonomic matting comes in basic geometric shapes sized to fit in most standard workstation layouts. Manageable in size, they can be simply laid down or rolled out. Mats can also be cut to specified lengths, widths, and shapes. For larger and custom mats, consider handling and access to the area in question.

Dual layer mats

We have a variety of familiar top surfaces, but the difference lies beneath. Only Wearwell gives you a choice of three sponges. The perfect solution if:

- The area is dry with medium to heavy foot traffic
 - Life expectancy in use is important
 - Goals include heightened morale, productivity, health, and safety
-

WEARWELL MATTING

Wearwell has a range of matting to meet everyday needs and more! With specialized anti-slide matting, anti-spark matting, and chemical resistant corrugated matting. Wearwell has the matting that will meet the needs of any environment.

WOW!
FINISH
**STOP
SLIDING
MATS!**

DIAMOND-PLATE WITH WOW! FINISH

Our latest innovation keeps mats from sliding around on the floor BUT allows them to be relocated as needed. Heel strikes and foot traffic can cause mats to slowly shift or “creep” away from its original location. This can damage the mat and pose trip hazards. The WOW! Finish keeps mats in place and prevents “mat creep”!

814/815 Nitricell® Diamond-Plate SpongeCote® with WOW!

Wearwell continues to set the industry benchmark in matting, flooring, and facility solutions. WOW!, a special finish that prevents mats from sliding in use, is no exception. Whether you are working on dusty concrete or slick epoxy, mats should not slide around. WOW! finally solves this decades old problem. UltraSoft Diamond-Plate SpongeCote with WOW! has taken our most premium UltraSoft products to the next level.

Rubber DP Spongecote®

Rubber DP elevates Diamond-Plate to the next level of resilience, traction, and ergonomics. More traction prevents slips; chemical resistant surface means a longer life, and an ignition point of over 500 degrees means deflected sparks and shards for welding. Wearwell's specially created Nitricell ergonomic sponge means more energy and morale on the job, and fewer injuries associated with overall increased productivity.

Fight fatigue with the industry's best Nitricell® sponge base. Rubber DP SpongeCote® repels sparks and delivers more slip prevention and chemical resistance than traditional PVC mats. The 1/8" surface is bonded to a Nitrile enhanced sponge base (Nitricell®) that absorbs repeated compression and bounces back to its original form better than any PVC sponge alternative. Accept no substitutes in your high-demand welding and industrial applications!

- Greater slip-resistance
- Melting point of over 500° Fahrenheit
- Unparalleled customization
- Best Nitricell Sponge
- Available in 2 thicknesses
- NSFI Certified

Standard sizes available in 1' increments up to 75'

DIAMOND-PLATE

Wearwell was the first to introduce Diamond-Plate in 1989. Since then, we've continued to innovate. Today we offer more diamond-plate options than any competitor.

Prioritize your mat's features by importance and use the star treatment to choose the diamond plate that best fits the needs for your industrial athlete.

Description	Made from 100% recycled urethane sponge, SMART® is a durable matting base that combines comfort, ecology, and economy. Best suited for dry commercial and industrial applications, this green material is a Wearwell exclusive.	Flex-Link™ is a PVC sponge comparable to those used by our competitors, at a similar price point. The difference is our tapered Flex-Link™ base, which offers a larger usable ergonomic area, reduces trip hazards, and keeps our mats from sliding.	No. 1 in customer satisfaction for over 20 years, Nitricell® is the industry original. Consistently outperforming competitors in critical categories, including comfort, customization, performance, rebound, and standing area. Available with GRITSHIELD™ for improved traction.

PVC AND RUBBER

Today's workers are being asked to perform in a range of environments. Give your industrial athletes a competitive advantage with the right surface. PVC and rubber matting is the right call if:

- The area is wet, dry, or slippery
- Chemical resistance and water resistance are important
- Goals include drainage and elevation above fluids and delivering safety and support to workers

TOP PERFORMANCE DOESN'T HAPPEN BY LUCK

Productivity, efficiency and safety are part of every successful team's winning strategy. Your industrial athletes need to stay focused and at the top of their game with the best surface under-foot. Hit it out of the park with high-quality, ergonomic mats and flooring.

**OVER
17%**

**Of All Disabling Workplace
Injuries Result From Falls***

24/SEVEN[®] LOCKSAFE[®] FLOORING

24/Seven[®] LockSafe[®] has a patented Positive Interlock System, so you can “lockdown” the mats securely and they stay together. Positive systems lock in: Both male and female connectors have a flange that lock together and provide a secure connection in all directions. Why it matters: They don’t come apart until you want them to! Lift up, roll up and roll away for removal or maintenance.

PATENT US D882,293 S

577 24/Seven[®] LockSafe[®] Solid

Choose 24/SEVEN[®] LockSafe[®] with a patented Positive Interlock System, so you can “lockdown” the mats securely and they stay together. Available in two distinct rubber formulations: GR (Grease Resistant), for areas with water or dry debris and NBR (Nitrile Rubber), for maximum effectiveness in areas with petroleum-based fluids.

PATENT US D882,293 S

582

24/Seven[®] LockSafe[®] Grade A[™]

Grade “A” mats are designed to combat fatigue while addressing specific issues unique to food production environments. 3'x3' interlocking tiles have strong connections and are easy to lift and clean. The proprietary Nitrile compound passes NFSI test ASTM G21-96 (2002), has GRAS status and is CFIA approved. Grade “A” gets an “A” for specialized food production applications. ‘Positive interlock’ allows the rubber tiles to lock in, while remaining easy enough to ‘unzip’ for reconfiguration.

24/SEVEN®

The 24/Seven® modular mat is a family of high-performance, interconnecting rubber anti-fatigue mats available in three distinct rubber formulations: GR (Grease Resistant), for areas with water or dry debris; CFR (Cutting-Fluid Resistant), for areas with mineral oil-based fluids; and NBR (Nitrile Rubber), for maximum effectiveness in areas with petroleum-based fluids.

570GR 24/Seven® Solid Grease Resistant

These resilient modular mats are 5/8" (16mm) thick and tough enough to handle 24/7 shift operations, while still being supple enough to provide cushioned support where it's needed. Because of its modularity, mats in this family can be combined and positioned to cover large flooring areas quickly. Choose from a solid mat design for drier areas or a perforated 15/16" hole variation to maximize drainage in wet workspaces. GRITSHIELD™ material can also be added to increase traction, if needed.

570NBR 24/Seven® Solid Nitrile Rubber

24/Seven® Nitrile Rubber's (NBR) compound is the most resistant in the 24/Seven® family. It stands up to all of the fluids resisted by the GR and CFR formulations, as well as animal fats, brake fluid, chlorine solution, diesel oil, petroleum-based hydraulic oil, salt water, and vegetable oil. 24/Seven® mats made with the NBR compound are available in solid and drainage variations.

ERGODECK® KITS

Each ErgoDeck® Kit has everything you need to set up an ergonomic workstation in minutes. ErgoDeck® rivals most rubber mats for maintenance, chemical resistance, and performance. No other interlock can touch the secure LockSafe® system! Regardless of the conditions, ErgoDeck® delivers!

552 Integrated No-Slip Cleats Solid Kit

ErgoDeck® with Integrated No-Slip Cleats kits have all of the components necessary to create a non-slip workstation mat. No tools or cutting needed! Embedded in the tiles, No-Slip Cleats withstand pressure washing and other heavy-duty cleaning methods. These ultra-rugged kits are perfect for individual workstations that reside in some of the toughest industrial environments.

24/Seven® LockSafe® Grade A™

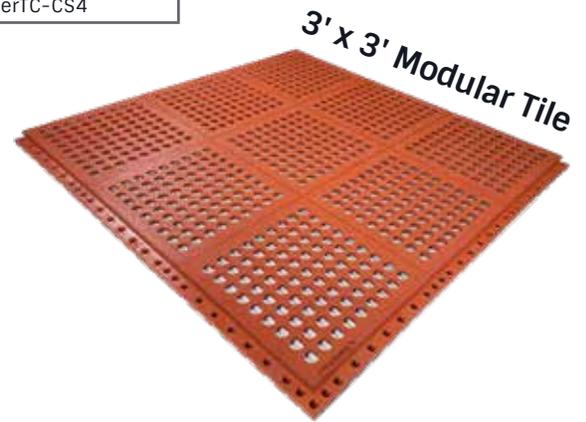

Grade "A" mats are designed to combat fatigue while addressing specific issues unique to food production environments. 3'x3' interlocking tiles have strong connections and are easy to lift and clean. The proprietary Nitrile compound passes NFSI test ASTM G21-96 (2002), has GRAS status and is CFIA approved. Grade "A" gets an "A" for specialized food production applications. 'Positive interlock' allows the rubber tiles to lock in, while remaining easy enough to 'unzip' for reconfiguration.

ANTI-FATIGUE RUNNERS

From light-duty to heavy-duty, we have runners that meet your needs and your budget.

These products are a safe call if:

- The area is dry with light to heavy foot traffic
 - You need an easily customizable ergonomic solution
 - Work flow requires long lengths of continuous anti fatigue surface
-

More than ever before, customers demand delivery that's accurate and fast. The number of distribution focused companies trying to meet those needs is growing. Get an edge on the competition by installing the right ergonomic surface to maximize the productivity and stamina of your industrial athletes.

\$360,000

in average annual savings related to anti-fatigue mats for a company with 175 standing workers.*

Need a longer runner?

Simply add more center mats for unlimited length!

"Wearwell was able to make a huge mat in a very unusual configuration for our parts assembly department. We didn't even know that could be done. Because our employees had to move around a lot, they were always tripping over the small mats we used to have. When we mentioned that to Wearwell, they immediately offered us a custom solution. We're so glad we went with Wearwell."

SWITCHBOARD

Switchboard matting has a singular purpose: to protect personnel from life-threatening electrical shocks. Often referred to as "insulated" or "non-conductive" matting, these products insulate workers from high voltages up to 30,000 volts.

Recognize the need for non-conductive matting if:

- Team members are exposed to high-voltage electricity
- The work area has high-voltage signs that indicate electrical danger
- The goal, first and foremost, is to ensure the safety of personnel

There's No Room For Error

High Risk areas are prone to cause injuries, and in some cases fatalities.
The costs are too high for sub-standard products.

311 DEATHS

due to electrical current in just one year in the United States.*

* Source: National Safety Council Injury Facts 2014 Edition

OUR SWITCHBOARD MATTING MEETS INDUSTRY STANDARDS

Industry Standard: ANSI/ASTM D178-01

Type I: made using any properly vulcanized elastomer

Type II: made using any properly vulcanized elastomer AND has additional properties such as Ozone Resistance, Flame Resistance, and Oil Resistance

Class 2 and 3 defines the dielectric strength: the higher the class, the greater the dielectric strength.

Navy/Defense Dept.

Standard: MIL. SPEC. 15562-G

Type I: Sheet, smooth surface

Type II: Mat, runner type, smooth surface

Type III: Mat, runner type, raised diamond-pattern surface

701

Diamond-Plate Switchboard Matting

Featuring a tough but attractive diamond-plate surface design, Diamond-Plate Switchboard Matting is an essential safety product for mining, utility, and other heavy-industry facilities – any industrial space where potentially lethal shocks can be encountered, it has a recommended max voltage of 17,000 volts.

710 Marbleized Military Switchboard Matting

Specially engineered for military applications, Marbleized Military Switchboard Matting meets Mil. Spec. DTL-15562-G, Type II. Max.7,500 volts. Designed for permanent flooring installation, this non-conductive mat has Dielectric Strength up to 30,000 volts and can be secured in place by using any vinyl-mastic adhesive. For installations of multiple mats that require seaming, Wearwell offers compatible welding thread. When installing several widths of Marbleized Military Switchboard Matting side-by-side, it is important to seal the seams to ensure reliable and consistent insulation. For best results, professional floor installers are recommended.

ESD

Wearwell offers both conductive and static dissipative mats designed to eliminate static shock. These products improve team performance and assure product quality.

Your field needs ESD defense if:

- Products being handled or produced are sensitive to static shock
 - The air in the workspace has high levels of combustible fumes or particulates
 - Your team is annoyed at the frequency of static shock
-

Chain Reaction

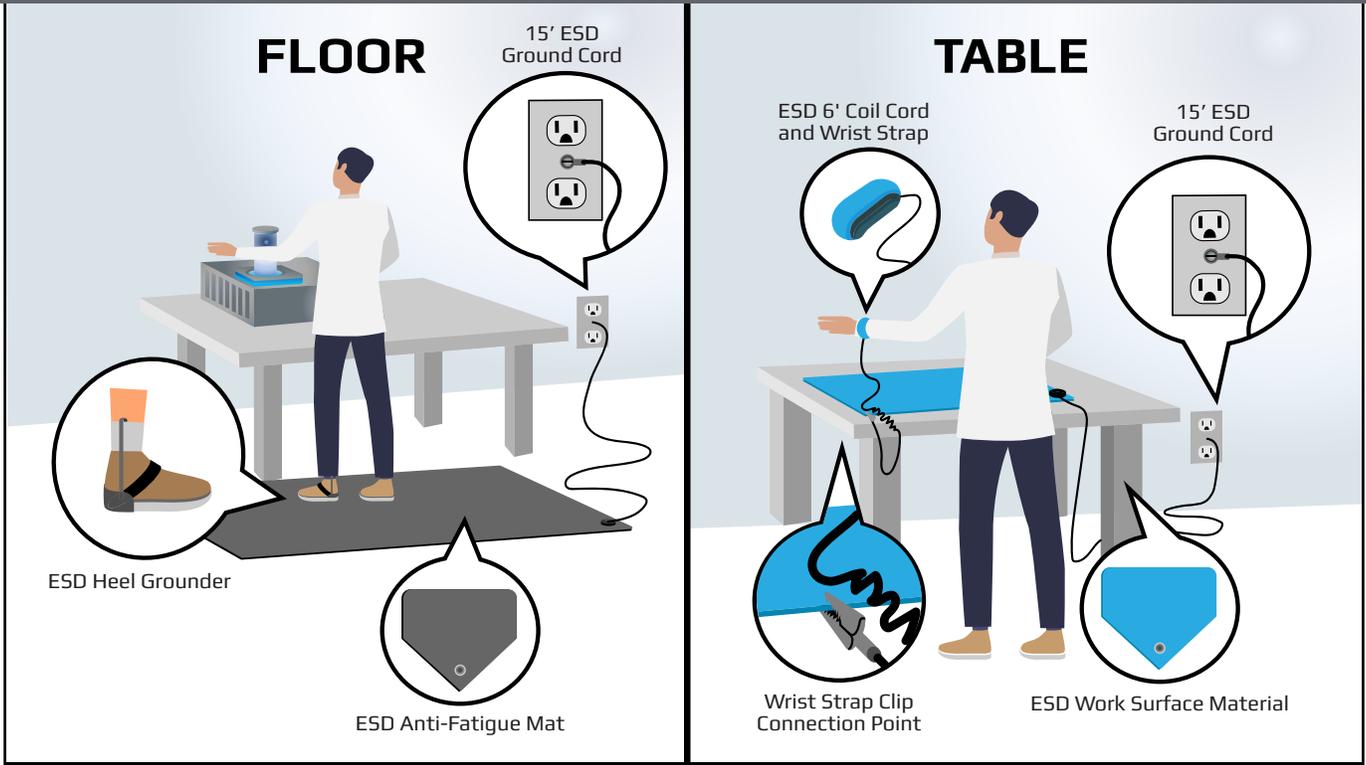

The costs are too high for sub-standard products. Once the cue ball is released there's no stopping the end result.

ELECTRONIC FAILURE

Computer parts, boards, relays are used in just about everything. Don't risk the entire product with damaged parts.

STATIC CONTROL & ESD

Static Electricity can produce damaging sparks that can ruin and destroy expensive equipment. Wearwell offers both conductive and static dissipative mats designed to eliminate static shock. These products promote improved team performance and assure product quality.

786

Electrically Conductive Anti-Fatigue

Electrically Conductive Anti-Fatigue protects sensitive electronic equipment while dramatically reducing workers' standing fatigue. Our No. 1 seller for static-control applications, it features our durable, top-of-the-line Nitricell® sponge, providing the best long-term value for ESD applications. Available in Smooth or Diamond-Plate surfaces.

MAT MUST BE GROUNDED WITH A GROUND CORD; WORKERS MUST WEAR HEEL GROUNDER OR CONDUCTIVE SHOES.

ErgoDeck® ESD

When static electricity builds up, it seeks a path to ground — often through the human body or through sensitive, conductive equipment. The best way to eliminate these risks is to create a static-dissipative environment. ErgoDeck® ESD — a comprehensive flooring solution — offers the best defense. Used over conductive sub-flooring, ErgoDeck® ESD is your best defense against both worker fatigue and static shock that could compromise the quality of your products. Made of a proprietary TPO/carbon blend, ESD properties permeate the entire tile. No snaps or additional grounding is necessary when used over conductive flooring. Positive interlocks stay secure, ensuring areas of any size are protected. When installed wall-to-wall, ramps and corners aren't necessary. For transition areas, use ErgoDeck® standard universal ramps. **MAT MUST BE GROUNDED WITH A GROUND CORD; WORKERS MUST WEAR HEEL GRINDER OR CONDUCTIVE SHOES.** PATENT US 8,006,443B2 US D5210,650S

770/772

24/Seven® LockSafe® ESD

Use LockSafe ESD to prevent static and protect sensitive electronic equipment. Made to cover large areas quickly, the 770 ESD can be placed directly atop a conductive coating or floor. The 'positive interlock' technology allows the rubber tiles to lock in, while remaining easy enough to 'unzip' for reconfiguration. Around electronics keeping a work area clean is very important. The LockSafe connection system allows the mat to be rolled up to make cleaning easier. **MAT MUST BE GROUNDED WITH A GROUND CORD; WORKERS MUST WEAR HEEL GRINDER OR CONDUCTIVE SHOES.**

SPECIFICATIONS

Compound: Grease Resistant Natural Rubber

Warranty: 1 Year

EOS/ESD S7.1: 1x10⁶-1x10⁹ (meets ANSI/ESD 20.20 requirements)

HEALTH, LAB, PHARMACY

Wearwell has a variety of products that deliver optimum support and address contamination concerns such as particulation, out-gassing, and the spread of bacteria. Your facility shares the concerns of healthcare and lab environments if:

- Areas are typically sterile and have like aesthetics
- Transition areas are crucial points for contamination control
- Team members need standing relief for long or multiple shifts

Anti-Microbial - Does not contribute to or support the survival or growth of microorganisms when tested in accordance with ASTM G21-96 (2002).

Add anti-microbial mats as part of your **PPE** requirement standards

REJUVENATOR®

Rejuvenator® provides optimum performance in the field of labs and pharmacies. Not only does it have a clean consistent aesthetic, it also meets the USP 797 compliance standards for non-viable particulates.

Rejuvenator® flooring, runners, and workstation mats help your team stand stronger, longer. Whether you need to cover an entire lab, a multi-shift pharmacy, or just a single workstation, Rejuvenator® delivers the ultimate combination of durability, ergonomics, and awesome good looks! Manufactured entirely from Polyurethane, this perennial all-star features an unparalleled lifetime-warranty. Simply put, we've engineered Rejuvenator® to outlast and outperform any would-be rivals. Rejuvenator® has quickly become the ergonomic floor surface of choice for top-performing companies worldwide.

502 Flooring

Available in domed and squared designs, Rejuvenator® Flooring features large, 3' x 3' (91cm x 91cm) and 1' x 3' (30cm x 91cm) modules — that interlock on all four sides to customize on-site virtually any flooring configuration. The interlock is incredibly effective and also hidden so the ergonomic floor you've created is seamless and stable underfoot. Having the ability to customize in one-foot increments and finish off with beveled ramps (yellow or black) sets it apart from all other Polyurethane "wannabes."

TILE-TOP SPONGECOTE™

From healthcare to laboratories, Tile-Top Spongecote™ AM is the ergonomic matting of choice for medical professionals. The smooth surface cleans easily and bounces back for long lasting performance.

WOW!
FINISH
**STOP
SLIDING
MATS!**

NEW **TILE-TOP SPONGECOTE WITH WOW! FINISH**

Our latest innovation keeps mats from sliding around on the floor BUT allows them to be relocated as needed. Heel strikes and foot traffic can cause mats to slowly shift or “creep” away from its original location. This can damage the mat and pose trip hazards. The WOW! Finish keeps mats in place and prevents “mat creep”!

819/820 Nitricell® Tile-Top SpongeCote® with WOW!

Wearwell continues to set the industry benchmark in matting, flooring, and facility solutions. WOW!, a special finish that prevents mats from sliding in use, is no exception. Whether you are working on dusty concrete or slick epoxy, mats should not slide around. WOW! finally solves this decades old problem.

Nitricell®

Product Family	496	494	419, 420
Description	Made from 100% recycled urethane sponge, SMART® is a durable matting base that combines comfort, ecology, and economy. Best suited for dry areas, this green material is a Wearwell exclusive.	Flex-Link™ is a PVC sponge comparable to those used by our competitors, at a similar price point. The difference is our tapered Flex-Link™ base, which offers a larger usable ergonomic area, reduces "sponge dust" and keeps our mats from sliding.	Anti-microbial (AM) top to bottom. Nitricell®, the AM nitrile rubber composite sponge offers maximum comfort and resilience, while the AM surface delivers additional abrasion and chemical resistance.

Entrance & Runners

Choose from a variety of surface patterns and thicknesses to suit your needs.

These products protect your fans, team and your facility, whether in the front office of a plant, educational facility or strip mall, There's room for a runner on your team.

- Work areas are slick, have high traffic, or need protection from wear and debris
 - You require a low-profile solution with good abrasion resistance
 - Your goals include eliminating slips and improving facility maintenance
-

The goal is simple. Drive Up Performance While Upholding High Safety Standards.

50% IMPROVEMENT
in circulation and musculoskeletal health from standing on an anti-fatigue mat*

Slips, Trips & Falls

The first step in prevention is evaluating how safe your floors are

MATTING ACCESSORIES

GripSafe Reflective Tape 050

This heavy-duty reflective tape prevents mats from sliding on almost any surface. Use it also to eliminate trip hazards and define borders in high-traffic areas.

SIZE	ITEM NUMBER
4" x 45' (10cm x 13.8m)	050.4x45YL

GripStrips 051

These two-sided tacky strips are designed to keep mats in place on highly polished surfaces. The strips remain sticky after cleaning so they can be reused.

SIZE	ITEM NUMBER
6" x 6" (15cm x 15cm)	051.6x6BL

Stick 'N Grip Double Stick Mat Tape 054

You don't have settle for slipping and sliding mats! Stick n' Grip tape isn't just any double-sided mat tape. It features two unique adhesives- one that sticks to the mat and the other that grips to the floor. Stick n' Grip works wonders on traditionally challenging floors like slick epoxy and polished concrete!

SIZE	ITEM NUMBER
2" x 180' (6cm x 540m)	054.2x180CL

PORTABLE ANTI-FATIGUE

518

Comfort2Go™

For workers on the go, Comfort2Go™ mats are the go-to choice that lives up to its name. A portable mat with a built-in handle, it's easy on the knees when you kneel and bolstering underfoot when you need some standing support.

A dual-layer anti-fatigue mat that features a long-lasting PVC surface and a premium nitrile rubber composite sponge base, A Comfort2Go™ mat measures 17" x 30" (43cm x 76cm). Protect yourself on the move with the mat that's always there when you need it.

WE'RE MATTING & SO MUCH MORE!

STOP CREEPY MATS!

WOW! FINISH KEEPS YOUR MATS IN PLACE TO PREVENT MATS FROM CREEPING

DIAMOND PLATE SURFACE

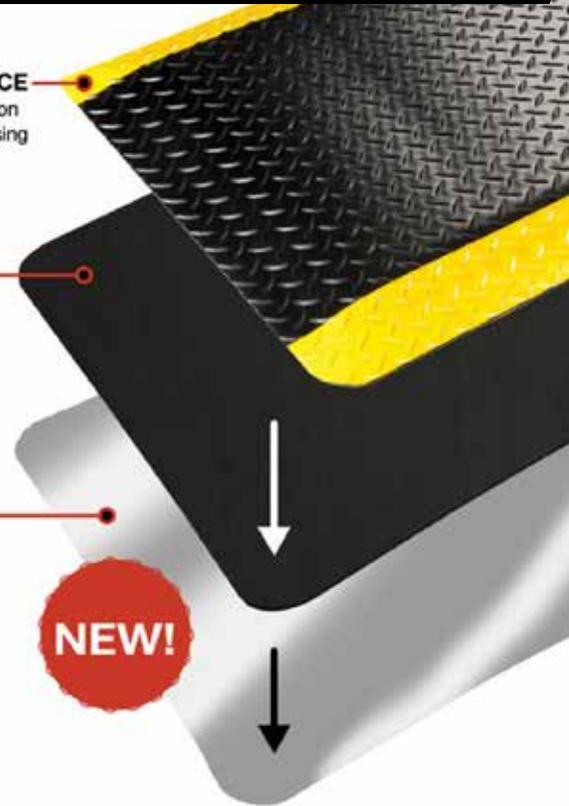

Durable top layer provides traction and abrasion resistance, increasing the overall life of the mat.

NITRICELL® PREMIUM SPONGE CORE

The nitrile rubber composite sponge offers maximum comfort and resilience. The result is improved circulation and reduced muscle aches, varicose veins and swollen feet.

WOW! FINISH

Our latest innovation keeps mats from slipping and sliding around on the floor BUT allows them to be relocated as needed.*
