FOUNDATION™ Modular Work Platforms for Food and Beverage

Group FPF1

By far, the largest safety challenge in the food and beverage industry is slip and fall prevention. FOUNDATION™ modular [work platforms](#) provide fast drainage and elevate employees safely above pooling fluids and slippery floors. The surface features integrated traction points for unmatched, long-lasting slip resistance.

All components of [FOUNDATION](#) platforms, including the aluminum frame, are corrosion resistant. **The 100% recycled polypropylene tiles stand up to a wide range of chemicals and fluids including vegetable oils, animal fats, citrus, and fish oil.**

As a fully modular system, FOUNDATION cuts down on the time, labor, customization, and costly manpower of traditional steel and wood platforms. Assembly and installation has never been easier! Choose from a range of heights, lengths and widths to form any shape or size down to 18" (.45m) sections.

Each 18" x 18" tile boasts a load rating of 400 pounds, providing all the support your team needs and more!

- Superior slip resistance
- Improves worker ergonomics
- Chemical, oil and fat resistant
- Made from 100% post-consumer recycled polypropylene
- 400 lb. (181.5kg) load capacity per tile

la Catégorie	Platform
Environnement Convient	Glissant
Personnalisation Niveau	C3
Drainage ou solide	Drainage
Composé	Polypropylene/Aluminum
Recyclé	54%
Garantie	1 year

Property	Test / Result
Inflammabilité	FMVSS 302: Pass B
Taber Abrasion	ASTM D3884: 0% @1000 cycles
Température ambiante	32-160F
Coefficient de frottement	ASTM F2913-19: 1.03 dry, 0.83 wet
Débattement de compression	Not Applicable
La force des larmes	Not Applicable
Estimation d'ESD	Not Applicable
Rigidité diélectrique	Not Applicable

Numéro de la pièce	UPC	Couleur	Épaisseur	Dimensions	Partie courante	UOM
