## FOUNDATION™ Modular Work Platforms for Food and Beverage

### Group FPF1

By far, the largest safety challenge in the food and beverage industry is slip and fall prevention. FOUNDATION™ modular [work platforms](#) provide fast drainage and elevate employees safely above pooling fluids and slippery floors. The surface features integrated traction points for unmatched, long-lasting slip resistance.

All components of [FOUNDATION](#) platforms, including the aluminum frame, are corrosion resistant. **The 100% recycled polypropylene tiles stand up to a wide range of chemicals and fluids including vegetable oils, animal fats, citrus, and fish oil.**

As a fully modular system, FOUNDATION cuts down on the time, labor, customization, and costly manpower of traditional steel and wood platforms. Assembly and installation has never been easier! Choose from a range of heights, lengths and widths to form any shape or size down to 18" (.45m) sections.

Each 18" x 18" tile boasts a load rating of 400 pounds, providing all the support your team needs and more!

- Superior slip resistance
- Improves worker ergonomics
- Chemical, oil and fat resistant
- Made from 100% post-consumer recycled polypropylene
- 400 lb. (181.5kg) load capacity per tile

<b>Art</b>	Platform
<b>Geeignete Umwelt</b>	Rutschig
<b>Anpassung Ebene</b>	C3
<b>Feste oder Drainage</b>	Drainage
<b>zusammengesetzt</b>	Polypropylene/Aluminum
<b>Recycelt</b>	54%
<b>Garantie</b>	1 year

Property	Test / Result
Entzündbarkeit	FMVSS 302: Pass B
Taber Abnutzung	ASTM D3884: 0% @1000 cycles
Temperaturspanne	32-160F
Coefficient der Friktion	ASTM F2913-19: 1.03 dry, 0.83 wet
Kompression Ablenkung	Not Applicable
der Riss Schwere	Not Applicable
ESD Bewertung	Not Applicable
Dielektrische Festigkeit	Not Applicable
