

100% ANTI-MICROBIAL RUBBER FOR FOOD PRODUCTION AND PROCESSING

- Meets the ASTM G21 standard for anti-microbial properties
- Knob style under structure for superior drainage and support
- Tiles interlock securely and come apart on demand for reconfiguration
- Cover large areas quickly with food processing ergonomic floor
- Color: Terra Cotta
- Overall thickness 1/2"

GRADE A 24/SEVEN® LOCKSAFE® No. 582

Grade "A" mats are designed to combat fatigue while addressing specific issues unique to food production environments. 3'x3' interlocking tiles have strong connections and are easy to lift and clean. The proprietary Nitrile compound passes NSF test ASTM G21-96 (2002), has GRAS status and is CFIA approved. Grade "A" gets an "A" for specialized food production applications. 'Positive interlocks' allows the rubber tiles to lock in, while remaining easy enough to 'unzip' for reconfiguration.
