

24/SEVEN[®] LockSafe[®]

**It's Time to
Think Positive!**

Lock it.

Leave it.

WEARWELL[®]

Anti-Fatigue Matting and Flooring

THE BATTLE IS REAL!

What's your strategy?

ALREADY?

They come apart, create trip hazards
AND make more work for you!

IT'S A DISASTER.

Zip-ties and glue aren't working.
They're making matters worse!

AT FIRST,
they look great!

DECISION TIME. You live with the constant
battle or return to the pains of concrete.

YOU'RE FED UP with the aches and pains!
You make the investment in matting.

...OR switch to
24/Seven® LockSafe®
**INSTALL IT AND
FORGET IT!**

**CONCRETE
SUCKS!**

POSITIVELY, ONE OF A KIND!

Positive, flexible connections stay secure to roll up, pick up or move for maintenance!

The difference is in the *positive*, LockSafe® connections.

POSITIVE systems lock in:

Both male and female connectors have ridges that lock together and deliver a secure connection in *all* directions.

Why it matters:

The mats don't come apart until you want them to! Lift up, roll up and roll away for removal or maintenance.

24/SEVEN® LockSafe®

Male Lock

Female Lock

PASSIVE systems lay in:

Traditional rubber products rely on these systems. The connectors nest; one connector inside the other. This provides only minimal, side-to-side security.

Why it matters:

Any upward movement (a misstep, a slight kick, pivoting traffic and, without a doubt, picking the mats up) and the connection is lost, and the tiles come apart. You now have a serious trip hazard.

BREAK THE CYCLE!

With traditional, passive connections, you never know what you're walking into from day to day. What started off as one cohesive system, could be **6 pieces, 10 pieces or more** for you to put back together... *again*.

Your time is too valuable for this madness!
the solution - 24/Seven® LockSafe®

**Pitch
the
zip-ties
and
glue
once and
for all!**

There's a ton of effort that goes into making the right decision, getting the approvals, scheduling the install and getting those mats in place. Your matting program should start paying off right away with **higher performance, improved productivity, increased safety and heightened morale.**

If other modular mats have let you down - **think POSITIVE** and choose **24/Seven® LockSafe®.**

NEW 24/Seven® LockSafe®

ERGONOMIC FLOORING

Our new patented design is the beginning of the end for zip-ties in your matting program!
Cover larger areas quickly with dependable, fatigue-fighting flooring.

GR COMPOUND

The GR compound is best suited for areas with water and dry debris.

NBR COMPOUND

The NBR compound is best suited for areas with water and dry debris, plus petroleum-based products.

HIGH TRACTION OPTION

Available with GRITSHIELD™ for optimum slip prevention.

QUICK INSTALLATION FOR LARGE AREAS

Large 3' x 3' mats cover large areas quickly and can be easily assembled to fit any configuration.

SIMPLE RAMP SYSTEM

Separate ramps and corners minimize cutting and makes installation faster and easier!

Learn more at Wearwell.com/LockSafe

The simple solution for smaller areas.

Completely molded in ramps for installation in seconds!

GR COMPOUND

The GR compound is best suited for areas with water and dry debris. It is also resistant to boric acid & ethylene glycol.

NBR COMPOUND

The NBR compound is best suited for areas with water and dry debris, plus petroleum based products.

MOLDED IN EDGING

No assembly required, available in 3 colors and popular standed sizes.

FATIGUE FIGHTING

Mat absorbs repeated heel strike and provides a safer work environment.

LARGER, STANDING & WALKING WORK AREAS

SHOWN WITH RAMPS

SHOWN WITHOUT RAMPS

24/Seven® LockSafe® Styles

Available in both solid and drainage

GRITSHIELD™ is available for both styles for extra traction.

Choose your compound based on your environment

NBR - Nitrile Rubber for areas with petroleum based fluids

GR - Grease Resistant, natural rubber for wet, dry or greasy areas

Ramps are available in black or yellow.
